Order from OTS or SLA $1.10 61-19694

Trans. of Khim[icheskiy] Volokna (USSR) 1959, no. 3, p. 39-43.

DESCRIPTORS: *Cellulose, *Air, *Bubbles, Solutions, Separation.

The basic processes occurring in the dispersed air-viscose system during deaeration are considered. It is shown that the phase transitions gas-liquid, formerly not taken into account, play an important role. The mathematical relationship between the time of complete deaeration of viscose and processing conditions is derived. It is shown that the experimental data on the determination of the time of deaeration of viscose agree with the theoretical curve. (Author)
